

Valdez Leonardo Juan Pablo

Tucumán, Argentina · [LinkedIn](#) · [GitHub](#) · [+54 381 613-4310](#) · vleonardojuanpablo@icloud.com · [Portfolio](#)

Less than 1 year of formal experience as a Software Developer. Led Globant's team of interns for the Front-end development of a learning platform, refactoring key components, improving loading speed by 15%, and achieving a Lighthouse score of over 95% in performance and accessibility.

EXPERIENCE

Globant

Front-end Developer Intern

Tucumán, Argentina

Jul. 2024 - Oct. 2024

- Designed and led the implementation of a scalable architecture for the Gloobcamp project, which allowed flexibility in adding new functionality and a solid foundation for future developments.
- Trained team members in the advanced use of Next.js and TypeScript, achieving a 50% increase in their ability to solve problems autonomously.
- Led the refactoring of key components, achieving a 30% improvement in project loading speed and a Lighthouse score of over 95% in performance and accessibility.
- Coordinated the planning and execution of sprints to develop an iterative MVP, achieving timely deliveries in each project phase.

SIDE PROJECTS

[GLOOBCAMP](#)

An educational platform for teaching HTML, CSS, JavaScript, and React, with lesson materials, quizzes, and progress tracking, which improved learning outcomes.

[AIPROMPTWIZARD](#)

An AI-powered tool for creating customized prompts for AI models like ChatGPT, DALL·E, and MidJourney, which optimized user interactions and enhanced AI results.
